API DOCUMENTATION

Single Sign-On integration for eGov partners.

API documentation Integration Credentials Usage

Q Search requests...

POST Generates Access Token

POST **SSO Authentication**

This spec's base URL is blank until you generate a credential — open the Credentials tab to get yours.

Variables

SSO Authentication

Documentation Test

POST `{{base_url}}/api/partner/sso_authentication`

SSO Authentication

Resolves the authenticated user’s profile for a partner application via Single Sign-On (SSO). Call this after obtaining an access token from `POST /api/token`.

Authorization

Type	Details
Bearer Token	Pass the access token in the <code>Authorization</code> header: <code>Bearer {{access_token}}</code>

Request Body

None — this endpoint takes no request body. The caller is identified entirely by the bearer access token.

Responses

Status	Meaning
200 OK	Authentication successful. Returns the authenticated citizen's profile (personal details, national ID, passport, etc.).
401 Unauthorized	The access token is missing, invalid, or expired.

Notes

- Obtain the access token first from `POST /api/token`.

AUTHORIZATION

[🔗 Bearer token](#) Authorization: Bearer `{{access_token}}`

EXAMPLE REQUEST

cURL

```
curl --request POST \
  --url '{{base_url}}/api/partner/sso_authentication' \
  --header 'Authorization: Bearer {{access_token}}'
```

EXAMPLE RESPONSES

200 200 - Success

401 401 - Unauthorized
