Variables

Municipality List by Params

Documentation

Test

GET

{{base}}/api/integration/datasets/municipalities?province_code=042100000

Municipality List by Params

Retrieves a list of municipalities filtered by a given province code. This endpoint is useful for populating location-based dropdowns or validating municipality data scoped to a specific province.

Endpoint

Method: GET

URL: {{base}}/api/integration/datasets/municipalities

Query Parameters

Parameter	Type	Required	Description
province_code	string	Yes	The province code used to filter municipalities (e.g. 042100000)

Authentication

This request uses a Bearer token stored in the `integration_token` environment variable. Ensure that `integration_token` is set in your active environment before sending the request.

Example Responses

Two saved examples are available for this request:

- Municipality List by Params - Success** — Demonstrates a successful response returning a list of municipalities for the given province code.
- Municipality List by Params - Error** — Demonstrates an error response, such as when an invalid or missing province code is provided.

AUTHORIZATION

 [Bearer token](#) Authorization: Bearer {{integration_token}}

QUERY PARAMETERS

Key	Value
province_code	042100000

EXAMPLE REQUEST

cURL

```
curl --request GET \
  --url '{{base}}/api/integration/datasets/municipalities?province_code=042100000' \
```

```
--header 'Authorization: Bearer {{integration_token}}'
```
